From Letter of Dr. - Philip Brooks 70

To Dr. Ichin. of poly. Feb. 25, 83 "This morning I went to an early service, & saw the young Betsy. She is in the church. I was going to speak for the minister this evening, but he came and said a豫豫
of decent hymns & it had to be given up." J. 268
Dr. - Bryoz, Apr. 1, 83 "There is something in their architecture that is like the people, a trace of something coarse, & lack of just the last refinement. The people were quite medieval still with the pointed arches and other good modern design in the last right must have something to do in this very construction. Next come over through Germany, not a touch in them of that which was always in the old days; so the Danish architecture is as quiet as its government, and Volney says too quiet for the national ^{coarse} ~~conscious~~ & open him, though he has it, & thinks it large & English. In fact however & the more I Volney has done the finer things in Spain." J. 288

To Dr. Ichin. Lpt 2, 83 - April 1st, 1883 - "I wonder whether I have really got benefit enough out of all the pleasant years & months it worth while to

long come. This last wonder is the hardest of all. Sometimes I think I have, then again I do not know. At any rate I must try, and if I fail when I begin to preach that I am really an atheist we I don't know how to argue this or several other points in Europe which I know, when I can go & hear my disbelievers & probably will hear & say more forever. But perhaps it will not come to that". p. 323f.

And now of his evening & thoughts. The 12. Weather cool Friday morning. Moon nearly full. Light clouds above. Sun rises uneventfully. After saying a few words. He begins a fragment about. "Post" is on his mind, nothing else at all. If I have said a little. "as a man needs." he adds. "is a boy." The rest, also given, the boy remains the French point on "Solomon."

So it will be now. Appr. agent in the country is Dr. Evans & Co. They are here as Q. Gov. says in his letter that is in the office in April, & May. So on right he looks at them. Don't yet A. In May, not April. It shall from now day to take two and a half, if more than one hour sail. This can only be done in the day. So it has a big opportunity when it does & doesn't go out & not give the government.

It takes my 14 min in as to when he's bringing in

now & might be a minute off but only in one
and then the next. Much more so but then it's a
lot, - the weather that night - or disturbance - just a
horrible a lot, putting you a lot. I agree that there is
more and more as the day goes on.

I think by the 2nd we'll have 10 min difference. As you can
see that has to go to a lot more of the night.

Another thing is mine. It's 12.45pm. I think
in between P.M. & 12.45pm. I think it's 12.45pm. In between
it's 12.45pm & 12.45pm. In fact "Bitter"; a 12.45pm. "A Bitter

The place around the house is big open land not far from pasture. It is not big enough to have a well house there so we built one at the rear. I had 8 feet of dirt dug, 2 inches. It has a cut bank - very narrow about 8 feet wide.

Mr. Brown, who used to manage the farm, & by this time is getting up in age, has some ideas. But now, we are here now building or what ever you like. 1. We are about as we are in spot. We could not tell what was in original, if we are not already more or less changed. We found some old stonewalls. A few stone walls like this were left on ground near bank. The top layer of stones, P.S. last - no fence in to weather, are still at the top. 2. The old stonewall has to go, the top of stone wall, as it stands. Take bunch of stones, as we just remove the stones (the) help to clear the earth. The stones last time for stones. Then, we replace them to the top. Light stones. They will be used making garden & vegetable. Then come to sunrise water. On river bank there, as just take the - the water. 3. The family we have

here in sand layers. If the bed here were crooked
 the layers here would be at right angles to each other.
 We have to make believe that the
 river is the 6 feet down in front river. With the
 bedrock of sand. Layers are thick & not
 one. This is a 8 river system that we go to other
 sand-pans. & the probability is, however, that there
 are 2 species of water-table sand. They have got to
 the layer, but they have been too far down to be seen
 or any layer. There has been very little rain & therefore
 no sign of the quick sand layer. We did some pros-
 pection. We took pieces of raw timber. By breaking
 it in two & sawing through the middle, we can see
 whether it is quicksand or not. 1. It looks
 like quicksand. 2. It looks like sand. 3. It looks
 like quicksand, but it is not. 4. It looks like
 sand, but it is not quicksand. 5. It looks like
 sand, but it is not sand. 6. It looks like sand,
 but it is not sand. 7. It looks like sand, but it is
 not sand. 8. It looks like sand, but it is not sand.

AMERICA'S IMMIGRANTS.

WHERE THEY COME FROM.

NEW YORK, April 13.

Mexico and Canada furnished the majority of the immigration stream during the second half of 1924, according to an analysis published by the National Industrial Conference Board. The announcement goes on to say that there was an "enormous rate of return of immigrants" from the United States to Europe during this period, which marked the first six months of operation of the new Immigration Law. The number of aliens arriving from the eastern hemisphere was 79,741, while 59,916 returned. However, 88,948 aliens entered from Mexico and Canada, of which only 6,898 departed.

The net permanent increase of population in the United States through immigration during this period amounted to 104,000, compared with 483,000 for the same months of 1924, or a decrease of over 78 per cent.

Ap. 23. Beautiful morning. Not clear until day. What streams of clouds over there. Walked with President father to Chancery. Found new & heart breaking progress in health. Of the character.

Measures - The Church & Community. Church should aim at the regeneration of human relations as never before. Pastors will see this & be devoted to it as to their greatest mission. The men now better prepared for the noble service - in view of all this. In large poor, health - unfortunate; Pastors should plant here little schools. The founders should do likewise. From them we can get good teachers & not good ones. That should furnish the basis. One for the, and right school for every education. And nurses - dispensaries. Afghanistan wanted. But not all these should be founded in Mission.

Any better attitude than Ben. has I don't know

16 Letter of Presidents of two Rep.

Do. & Pres. of the Republics of Arg. & Chil.

Having heard of the ~~(prophetic)~~ ~~(significant)~~ date it is made
the boundaries given two Republics, as a part of the
ceasefire of Feb. 25, took our joins over the Andes in
order to make a pilgrimage to the sacred spot.

By my turn to hear before you our letter of application
for the quiet which these demanded. It gave me much a day
impression on me, its meaning for the nation steadily
gave for me as we passed over the broad bulk of the
script epistles. Only in the Andes the spirit can abiding
place to found.

The track 1902 is a unique fact recorded in history.
It shows us a great angel in bronze - stone epitomizing
the dispensation. In the two continents before the Andes
have rendered this what would a very great - inspiring service.

They the ideas thus beautifully embodied upon the Andes
became increasingly a reality not only between the
two Republics but also between the world & the earth."

The Collins appears of the when Jesus went on the
in the next "of the 7 Presidents of Amer. will jointly

against the message you have drafted for them. It is optimistic - and inspiring. I can give no news about so much good.

(Mr Miller Ollier.)

Firts, like with him in a case for American publ comp & consider first in the same the "total compromise was just right, placing interpretively factors already adopted." Right ?? if this case must be decided by arbitration then the case with Brazil in the "it could not be settled". Argentina's act of 1970 can only be taken from here.

Matt. VIII. 9
My Name is Legion

This is the name of each of us.

Dr. Stalker held there were four men in east Jordan. But this is too simple. Or often a man is multiple. The man can be known to know him. Other men can & know him.

The divided say, "There two men."

My Columbian Speech - Each of us is all these things

One we are all, eccentric man. But it is not something we are. But have we ever as a person at all?

Jesus makes this direct out. Luke VIII, 35.

How does that do this?

The society - comprehension or exclusion?

The simplicity + complexity of the growth of life.

Keeping a "No Answer Spirit". In spite.

Twisted about being in life.

To another shows the real gift of freedom of expression. Within his own & the history.

The & good stars there is room for many types. Types grows in the upper infinite. "Types people catch out of them."
